FT - 1st Team Analyst Role

Insights and Responsibilities

LIVINGSTON FOOTBALL CLUB

About Our Club

Our elite-level football club competes in the top tier of Scottish Football & has done consistently over the last decade. We continually look to bring exceptional talent to our club via the opportunity to work within our football Club.

What We Need

We are looking for a highly motivated individual who can bring an elite level analytical mindset to our football club.

A pro-active approach to football analytics that will add value to our 1st team footballing department, working closely with the 1st team coaching staff.

Role Overview

Pre-Match Analysis

Deliver high-quality pre- and post-match telestrated footage that will enhance & improve player education & game understanding while helping the TEAM on a match-day.

Training Support

Support training sessions with evidence-based insights, ensuring that players receive data-driven guidance to refine their skills effectively and accordingly with the coaching staff's principles.

Team Liaison

Liaise across multidisciplinary teams for holistic player development, fostering collaboration between coaches, analysts, and fitness professionals within the LFC footballing structure

Key Responsibilities

This slide outlines the key responsibilities essential for effective performance analysis, including match analysis, performance reporting, and innovative techniques to enhance team performance and player development.

Match Analysis

Conduct detailed opposition and in-game analyses using video and data tools.

Comfortable recording matches live within a highly pressured environment.

Performance Reporting

Prepare clear, actionable reports and presentations for coaches and players.

This will be required pre & post game

Training Integration

Provide analytical feedback during on-pitch sessions and meetings.

Data Management

Maintain and develop analytic databases for optimal information retrieval.

Innovation

Suggest and implement new analytical techniques to maintain competitive edge.

Identify trends that can be analysed and integrated into the LFC structure

Essential Skills & Experience

Analytical Thinking

Strong quantitative and qualitative analysis skills enable informed decision-making and strategic planning in various contexts.

Technical Proficiency

Experience with video editing, coding (Angles/Amplify, Tactic-Pro), and data visualization enhances overall project execution and presentation quality.

Football Knowledge

Deep tactical understanding at elite/professional level allows for effective strategy development and player performance enhancement.

Communication

Ability to present complex insights clearly to coaches and players bringing clarity & a better understanding to the pre & post match presentations

Team Player

Committed, proactive, and adaptable within a high-performance environment where the WE is always paramount to everything WE do.

Working with tight deadlines

The ability to work in a highly pressurised environment and deliver within tight deadlines

This position is for an individual who has extensive knowledge of football analytics and has held a similar role within an elite-level football club.

Required Qualifications

Candidates MUST have experience of working within elite level football, ideally hold a UEFA coaching certification, and have experience with working with adults from 18+. Proficiency in sports analysis software and advanced knowledge of data analytics tools is ESSENTIAL.

IT efficent	Coaching Cert	Athlete Experience	Software Proficiency	Data Analytics
This is essential for the role.	UEFA coaching certification again this is not essential but would be desirable	Experience working with elite professional football environment	Proficiency in sports analysis software (e.g., Hudl, Wyscout, Tableau, Statsbomb)	Advanced knowledge of data analytics tools and coding languages
